PROFILE

Computer Engineering undergraduate with hands-on experience in full-stack MERN applications, mental health platforms, and intelligent chatbot systems. Passionate about building scalable, user-centric solutions focused on emotional well-being, analytics, and secure digital experiences.

EXPERIENCE

Hari Om Thalassic Pvt. Ltd.

Mumbai, India

Frontend Developer Intern

July 2025 – October 2025

- Worked on frontend development tasks for enterprise-level applications in a professional environment
- Collaborated with backend developers to integrate APIs and dynamic data into user interfaces
- Contributed to both frontend and backend modules, gaining exposure to full-stack development
- Proposed innovative UI and workflow improvements that added measurable value to ongoing projects
- Demonstrated strong problem-solving skills, adaptability, and adherence to project deadlines

PROJECTS

Mental Health & Mindfulness Journal | MERN Stack

- Developed a full-stack MERN web application for digital journaling and mood tracking
- Implemented mood analytics with interactive charts to visualize emotional patterns
- Designed therapist, admin, and user dashboards with role-based access control
- Enabled anonymous community support circles with moderated discussions
- Implemented a soft-ban moderation system without data loss

Mental Health Support Chatbot | NLP, Node.js, MongoDB

- Built an intelligent chatbot capable of understanding 15+ emotional states
- Implemented sentiment analysis to track and visualize user mood trends
- Generated empathetic, non-repetitive responses with contextual self-care suggestions
- Developed an admin dashboard for monitoring analytics and user engagement
- Integrated Firebase authentication and MongoDB Atlas for secure cloud storage

Memory-Game-Web- | HTML, CSS, JS

- built a card memorizing game
- Implemented score system of right and wrong card picking
- Added Levels for increasing Difficulty

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, HTML, CSS

Frontend: React.js, Context API, Vite, Recharts

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MongoDB Atlas, Mongoose

Authentication: JWT, Firebase Auth, bcrypt
